FIELDS OF INTEREST	Health Economics, Labor Economics, Public Economics	
CURRENT POSITION	Bowdoin College Visiting Assistant Professor	Brunswick, Maine July 2025 - June 2026
EDUCATION	University of California, Riverside Ph.D., Economics <i>Committee: Michael Bates (Chair), Bree Lang, Ajin Lee</i>	Riverside, California June 2025
	Chung-Ang University M.A., Economics M.A. coursework, Linguistics B.A., Economics and English Language and Literature <i>magna cum laude</i>	Seoul, South Korea August 2018 September 2015-June 2016 January 2013
AWARDS AND HONORS	Distinguished Teaching Award (UC Riverside) Dissertation Completion Fellowship Award (UC Riverside) Outstanding Teaching Assistant Award (UC Riverside) Dean's Distinguished Fellowship (UC Riverside) Scholarship for an Outstanding Performance (Chung-Ang University)	2025 Spring 2025 2021, 2025 2018-2019 Fall 2008
WORKING PAPERS	Policy, Substance Use Disorder Treatment Access, and Overdose Deaths (JMP) Examines how the Affordable Care Act (ACA) affected the availability of residential substance use disorder treatment facilities and reshaped the broader treatment landscape using county-level data from 2004–2016. Difference-in-differences and event-study estimates show that residential treatment facilities per 100,000 population increased by 24 percent in counties with low pre-ACA facility density and by 15 percent in Medicaid expansion states. Growth was concentrated in areas with existing providers and accompanied by declines in outpatient facilities. The analysis finds no corresponding reductions in fatal or nonfatal overdoses, suggesting limited public-health benefits from this expansion. The full paper is available here .	
	Spillover Effects of Malpractice Disclosures on Physician Relocation Examines whether public malpractice disclosures lead to peer relocation within practice groups by linking data from the Medical Board of California and National Provider Identifier files. The full paper is available here .	
	The Effect of Building Affordable Housing on Student Mobility Examines whether the Low-Income Housing Tax Credit program improves residential stability for families with school-age children using student data from North Carolina. Summary of findings available here .
